

Why are we REGULATED!

Ray Fuentes
Coca Cola Bottling Co. Consolidated

Our Environmental Policy Statement

To protect the Health and Well Being of our Employees, the Community and the Environment.

- Maintain an Environmental Management System (EMS) appropriate for all site activities, whether related to **making** (manufacturing), **selling** (sales), or **delivering** (fleet and equipment) **soft drinks**.
- Establish and review key environmental objectives and targets.
- Continually strive to improve our efforts to conserve natural resources and prevent pollution.
- Comply with relevant legislation, regulations, and other applicable requirements.

These commitments are consistent with the Values, Actions, and Goals in our Mission.

Our Goal is to incorporate environmental management into existing business operations by involving employees at all levels. Environmental management is not a burden, but a tool to minimize waste, reduce cost, and help the local environment.

We are in this together!

1. Our facilities are required to establish and nurture partnerships with our municipalities.
2. Create a dialogue to break down walls so that we are not viewed as “the bad polluter”!
3. We own our responsibility.
4. Have a common goal.
5. Want to do the right thing environmentally.

How do we participate?

- Stay informed on impacts to our permits.
- Participate, as appropriate, in industrial and commercial coordination for the management of wastewater discharges.
- Re-examine wastewater facility (pretreatment) for effective delivery of wastewater quality to minimize impact to POTW.
- Proactive approach to water uses, scorecard Water Use Ratio to maximize water use efficiencies.
- We seek guidance, training, and collaboration.
- Review upcoming changes with our municipality to keep them in the loop.
