

**Seth Brown**

Stormwater Program and Policy Director  
Water Environment Federation  
Alexandria, VA

**Seth Brown** is the Stormwater Program and Policy Director at the Water Environment Federation (WEF). In this capacity, Mr. Brown leads WEF's Stormwater Program by working with WEF members and others in the stormwater community to identify technical needs in the field and work to develop programming and products to meet these needs. He engages in partnerships with outside groups on collaborative efforts to further the stormwater profession and topic. This position also involves tracking upcoming Federal legislative and potential regulation changes relevant to the stormwater and wet weather community as well as providing general policy support on water sector issues. Mr. Brown has a BS and an MS in civil engineering, is a licensed professional engineer in the state of Maryland and is currently pursuing a PhD in civil engineering at George Mason University in Fairfax, VA.
