

**Chris Kloss**

Green Infrastructure Coordinator

Office of Water

U.S. Environmental Protection Agency

Washington, DC

**Chris Kloss** is the Office of Water's Green Infrastructure Coordinator. The Green Infrastructure program supports the U.S. Environmental Protection Agency's (EPA) regulatory and non-regulatory programs by assessing how green practices can address wet weather issues and achieve community environmental and social goals. The program also collaborates with federal, state, local and non-governmental organization partners to assess how green infrastructure can be used to create sustainable infrastructure and provides outreach and technical support.

Mr. Kloss has a MS in Environmental Policy from the University of Maryland, a MS in Environmental Engineering from Virginia Tech and a BS in Biological Resources Engineering from the University of Maryland. He has been working on green infrastructure and stormwater issues for the past decade, with experience in the non-profit sector prior to joining EPA.
