

Richard R. Stevens

Biosolids Program Manager
Health & Ecological Criteria Division
Office of Science & Technology
Office of Water
U.S. Environmental Protection Agency
Washington, DC

Rick Stevens is a Senior Biologist and National Biosolids Regulatory Coordinator for the U.S. Environmental Protection Agency.

As a Senior Biologist and National Biosolids Regulatory Coordinator, Mr. Stevens performs a variety of scientific and technical functions related to improving or sustaining water quality. These functions include the regulation and management of sewage sludge, as well as providing technical expertise and management of human health and ecological risk assessment that support planning, policy, and regulatory implementation

He was instrumental in preparing a response to the National Research Council's 2002 report *Biosolids Applied to Land, Advancing Standards and Practices*.
