

Adriane P. Borgias

Water Quality Lead, Toxics, Spokane River
Washington Department of Ecology
Spokane, WA

Adriane Borgias is the water quality lead for the Washington State Department of Ecology and works on issues specific to the Spokane River. Her primary responsibility is working with the Spokane River Regional Toxics Task Force, a collaborative effort that is focused on reducing toxics inputs to the river.

Prior to working for Ecology, Ms. Borgias has had a well rounded career working in the gas and electric industry, as the Environmental Director for the Kootenai Tribe of Idaho, and as the owner of her own consulting business. She has done a “little bit of everything environmental.” She is passionate about the environment and engaging with collaborative efforts to solve difficult environmental problems.

Ms. Borgias has BS in Chemistry from UC Berkeley and an MS in Environmental Management from the University of San Francisco. She is also a Certified Hazardous Materials Manager. In 2010 she spent time in Bangalore, India as a Fulbright-Nehru Environmental Leadership scholar.
