

Bruce Tiffany

Water Quality Engineer

Industrial Waste Program

King County Department of Natural Resources and Parks

Seattle, WA

Bruce Tiffany is the staff engineer for the Industrial Waste Program in King County, Wash. He has been with the Industrial Waste Program for 13 years where his responsibilities include reviewing and approving industrial wastewater pretreatment systems, evaluating industrial wastewater discharge requests, and providing technical support to staff. An additional responsibility includes being the King County – Wastewater Treatment Division representative on the Lower Duwamish Waterway – Source Control Workgroup, which is a technical group of several regulatory agencies with roles and responsibilities for the Lower Duwamish Waterway Sediment Remediation Project under Superfund.

Mr. Tiffany is a professional engineer licensed in Washington State in the area of environmental engineering, with 16 years of experience as an environmental engineer and 10 years of prior experience as an analytical chemist and environmental scientist.

Mr. Tiffany has a BS in Business-Chemistry from Southern Oregon University and a MS in Environmental Science and Engineering from the Oregon Graduate Institute at Oregon Health and Science University.
