

**Kelly Graham**

Program Manager, Industrial Pretreatment  
City of Bend  
Bend, OR

**Kelly Graham** has worked for the City of Bend for over 17 years. She started out in the City of Bend Laboratory and inherited the informal Industrial Pretreatment Program (IPP) in 2001. She has developed and implemented the formal Industrial Pretreatment Program in 2005. When she started the IPP program, the City of Bend had only two breweries.

At last count, they have 17 micro-breweries and one medium size brewery, all discharging to a 5.5 million gallon per day wastewater plant. She gets many calls from cities and states asking for information about brewery wastewater and the effects on wastewater treatment plants.
