

**Timothy Potter**

Environmental Compliance Superintendent  
Central Contra Costa Sanitary District  
Martinez, CA

**Tim Potter** has more than 28 years of environmental management experience with California hazardous waste/materials and water quality protection regulatory programs. For the past 21 years, he has managed the Source Control Program for Central Contra Costa Sanitary District (Central San). Central San is a special district providing sanitary sewer collection and treatment service for more than 465,000 residential, commercial and industrial customers in central Contra Costa County located in the San Francisco Bay watershed of California.

Central San's Source control program includes the traditional pretreatment program, dental amalgam program, controlling Fats, Oils & Grease (FOG), and pollution prevention. In addition, Central San provides storm water compliance services to cities under a service contract. Conducting investigations into discharges, or the effects of discharges, is an integral part of Central San's Source Control Program.

Mr. Potter is an active member of the California Water Environment Association's Pretreatment, Pollution Prevention and Stormwater Committee and the Bay Area Clean Water Agency.

Mr. Potter holds a double BS in Environmental Science and Development Studies from University of California Berkeley, and a MS in Environmental Management from the University of San Francisco.
