

D. Cameron Prell

Senior Counsel

McGuireWoods

Washington, DC

Cameron Prell concentrates his practice on transactional matters related to energy, environmental, natural resource and financial laws and regulation, with a particular focus on energy markets, infrastructure, advanced technologies and sustainable finance and development. For the past 15 years, he has helped domestic and international clients develop energy, water and environmental projects, trade energy and environmental assets and associated derivatives, and pursue sustainable, low carbon capital investments through equity investment, public-private partnerships or innovative debt financing.

As part of such transactional matters, Mr. Prell is a leading attorney nationally on the convergence of energy and environmental law with financial regulation and market-based incentives. He helps clients navigate energy markets and subsidies, international environmental markets, bilateral and multilateral financing mechanisms, international trade, and securities and commodities regulation (e.g. EPA, FERC, DOE, CFTC, SEC, OPIC). He also helps clients address enterprise and asset-level risks associated with climate change-related performance standards and regulation. Prell has represented private equity funds, electric and gas utilities, natural resource companies, clean energy project developers and technology firms, commodity traders, financial institutions, and municipalities, in their respective efforts to address, invest in, or adapt to a changing climate, market and regulatory landscape.

Mr. Prell writes and speaks around the country on climate change law governance and clean energy policy, climate finance and asset securitization, financial risk mitigation, and sustainable development project implementation. He is on the Board and is chair of the North America Working Group for the UK-based Climate Markets and Investment Association and is active with several climate, water and clean energy trade associations.

Mr. Prell is the co-chair of the McGuireWoods Water Industry Team and its Cleantech Capital Group. He currently serves as vice-chair of the American Bar Association's Energy and Environmental Markets and Finance Committee and the International Law Section's International Environmental Law Committee
