

Luis Montestruque

President

EmNet, LLC

South Bend, IN

Luis Montestruque is the President and Chief Technology Officer for EmNet, LLC. His research focused on cyber physical systems, and more specifically, the control of large networks using dynamic models. Shortly thereafter, he founded EmNet to study and develop solutions to optimize the operation of complex wastewater collection systems. EmNet's Real Time Decision Support System technology helps utilities maximize the use of existing and future infrastructure to reduce combined sewer overflows volumes and frequencies.

Mr. Montestruque earned his BS in 1996 from the Pontifical Catholic University of Peru and his PhD in Control systems at the University of Notre Dame in 2004.
