

Patrick Schultz, PhD

Vice President, Operational Transformation

Veolia North America

New York City, NY

Patrick Schultz is Vice President of Operational Transformation at Veolia North America and currently serves as the Program Manager for Veolia's Peer Performance Solutions (PPS) contract with the New York City Department of Environmental Protection, the City's water and wastewater utility. He also leads the development and implementation of Veolia's performance transformation and change management practices for the PPS business unit in North America and in support of business development worldwide.

Dr. Schultz joined Veolia in 2011 from McKinsey & Company where he had worked with a wide range of clients on performance transformation and strategy projects across various industry sectors including water utilities, chemicals, oil and gas, and semi-conductor manufacturing.

Dr. Schultz received a PhD in Geosciences from Princeton University for his research on the impact of climate change on ocean ecosystems. He also holds a MS in Environmental Engineering from Michigan Technological University and a Dipl.-Ing. in Environmental Engineering from the Universitaet Stuttgart in his native Germany.
