

Theresa Connor

Research Program Director

Water Environment Research Foundation

Alexandria, VA

Theresa Connor joined the Water Environment Research Foundation (WERF) nearly a year ago after 13 years at Sarasota County, Florida where she served as the Water Resources General Manager and Utility Director managing the water, wastewater, reclaimed water, stormwater, and solid waste utilities and natural resources program. Prior to Sarasota, she was a consultant in the Midwest assisting communities with operational plans for their combined sewer systems and other wet weather issues. At WERF, she is managing the Stormwater and Decentralized Systems challenge areas and the Sustainable Integrated Water Management challenge that includes looking at Institutional Issues to Green Gray Infrastructure, Land Use planning considerations, Green Infrastructure Issues and On-Site Water Systems.

Ms. Connor has a MS from Iowa State University and a MBA from Webster University. She has served as the president of the Florida Stormwater Association and the Sarasota County Science and Environment Council.
